

Creating database:

```
CREATE DATABASE cse'18
```

FOR CREATING TABLE

```
CREATE TABLE TableName(1st column name datatype(size),2nd column name Datatype(50),.....)
```

To see data from table

```
SELECT * FROM <table_name>
```

Inserting data

```
INSERT INTO table_name VALUES('value of 1st column', 'Data of 2nd column')
```

To see particular thing:

```
SELECT * FROM table_name Where column name
```

```
SELECT * FROM table_name col="value"
```
